**PETITION TO WITHDRAW THE HOLDING OF ABANDONMENT  
UNDER 37 C.F.R. 1.181**

Sir:

This is a Petition under Rule 1.181 for withdrawal of the holding of abandonment in the above-captioned matter on the grounds that the Restriction Requirement allegedly mailed from the U.S Patent and Trademark Office on February 21, 2008, was never received by Applicant's undersigned representative.

**STATEMENT OF FACTS**

1. A Restriction Requirement, addressed to Edwards Angell Palmer & Dodge, LLP, the undersigned's firm, was allegedly mailed from the USPTO on February 21, 2008. This Restriction Requirement was not received by our office.

BOS2 704000.1

U.S. Application Number: 10/557,283  
Response Date: November 10, 2008

Docket No.: 61383(71699)

2. On September 24, 2008, a Notice of Abandonment was mailed from the USPTO. This Notice was received by our Office on September 26, 2008. A copy of the Notice of Abandonment is attached hereto as Appendix A.

3. The Notice of Abandonment stated that the subject application was held to be abandoned for failure to respond to a Office Letter allegedly mailed from the U.S Patent and Trademark Office on February 21, 2008. A copy of the Restriction Requirement (printed from Public PAIR) is attached hereto as Appendix B.

4. Although the Restriction Requirement is correctly addressed to the undersigned's firm, I hereby state that this Notice was never received at this firm.

5. I hereby state that a search of the file jacket and docket records for the subject application in the offices of Edwards Angell Palmer & Dodge, LLP, indicates that the Restriction Requirement was never received. A copy of a docket printout for the subject application, covering the period from August 2004 until the present, is attached hereto as Appendix C. Had the Restriction Requirement been received, the docket printout would have included a deadline for response to the Restriction Requirement (e.g., a response due date of March 21, 2008, one month from the date of mailing of the Restriction Requirement). No such deadline for response (or any other deadline associated with the receipt of a Restriction Requirement) appears in the docket report.

### **RELIEF REQUESTED**

Applicants respectfully request, based on the foregoing facts and statements and the following arguments, that the Commissioner withdraw the holding of abandonment and reinstate the subject application to pending status.

### **ARGUMENT**

This Petition and the related enclosures are being filed within two (2) months of the mailing date of the Notice of Abandonment. Accordingly, this petition is believed to be timely filed pursuant to 37 C.F.R. 1.181(f).

U.S. Application Number: 10/557,283  
Response Date: November 10, 2008

Docket No.: 61383(71699)

In the present case, Applicant has included the required statements by the practitioner, and provided appropriate supporting evidence, to establish non-receipt of the Office Communication (the Restriction Requirement) which formed the basis for the holding of abandonment. Accordingly, the present application should not have been considered to be abandoned, and Applicant requests that the application be restored to pending status.

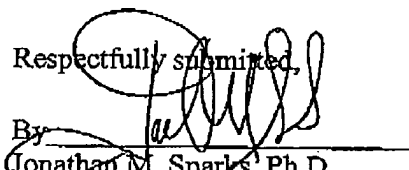

#### REQUIRED FEE

There is no fee required for the submission of a Petition under Rule 181, and it is believed that no fee is due. However, if for any reason a fee is required for consideration of this Petition, a fee paid is inadequate or credit is owed for any excess fee paid, the Commissioner is hereby authorized and requested to charge Deposit Account No. 04-1105 under Order No. 61383(71699).

Dated: November 10, 2008

**DETAILED ACTION*****Status of Application, Amendments and/or Claims***

The preliminary amendment of 11/19/05 has been entered in full. Claims 4-9, 11, and 17 are amended. Claims 12-16, 18-28, 30-36 are canceled.

Claims 1-11, 17, 29, 37 and 38 are pending in the instant application.

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11, drawn to a method of determining risk comprising measuring the level of ApoC1 protein in a sample from a subject.

Group II, claim(s) 17 and 29, drawn to a method of identifying a test compound that binds to ApoC1 or inhibits ApoC1 activity.

Group III, claims 37 and 38, drawn to a method of treating a subject comprising administering an ApoC1 inhibitor.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Pursuant to 37 C.F.R. 1.475 (B-D), the ISA/US considers that where multiple products and/or processes are claimed, the main invention shall consist of the first invention of the category first mentioned in the claims and the first recited invention of each of the other categories related thereto. In the instant case, there are no product claims, only three categories of process claims.

Accordingly, the main invention consists of the first process of use of ApoC1 protein (Group I), the second invention consists of the next process of use of ApoC1

protein (Group II), and third invention consists of a process of use of an ApoCI protein inhibitor.

***Elections of species***

If Group I is elected, in addition to the above restriction requirement, 3 elections of species are required as follows:

(I) Group I contains claims directed to more than one species of patient sex: (a) female or (b) male.

The claims are deemed to correspond to the species in the following manner:

1. Claim 5 corresponds to species (a).
2. Claims 1-4 and 6-11 are generic with respect to these species.

(II) Group I contains claims directed to more than one species of patient history:

(a) wherein the patient has been previously diagnosed with atherosclerosis and (b) wherein the patient has not been previously diagnosed with atherosclerosis;

The claims are deemed to correspond to the species in the following manner:

1. Claim 6 corresponds to species (a).
2. Claim 7 corresponds to species (b).
3. Claims 1-5 and 8-11 are generic with respect to these species.

(III) Group I contains claims directed to more than one species of patient age: (a) Infant and (b) not infant;

1. Claims 9-11 corresponds to species (a).
2. Claims 1-8 are generic with respect to these species.

Each of these groups of species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Applicant is required, in reply to this action, to elect a single species of (I) patient sex; (II) patient history; and (III) patient age to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An

Application/Control Number: 10/557,283

Page 4

Art Unit: 1646

argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Risk for development of disease is often correlated with highly specific subsets of patients. Patient sex, history and age may independently contribute to a correlation between ApoC1 protein level and risk of disease. Lack of unity is shown because the species of patients lack a common utility which is based upon a common structural feature which has been identified as the basis for that common utility.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zachary C. Howard whose telephone number is 571-272-2877. The examiner can normally be reached on M-F 9:30 AM - 6:00 PM.
